

SD-WAN

High-Quality Voice &
Network Performance

SD-WAN Overview

RingSquared™ delivers the high-quality voice and application performance your business needs with secure, powerful SD-WAN. Dual connections allow the SD-WAN to choose the best connection to prevent dropped calls and ensure optimal uptimes.

Key Capabilities

1 Reliable Coverage

Reliable voice & data coverage with seamless failover and load balancing.

2 Automatic Management

Automatic traffic orchestration manages & balances dual connections.

3 Superior Business Continuity

Connect to our secure, redundant switching & routing infrastructure.

4 Flexible, Scalable System

Connect multiple locations to one cloud-based SD-WAN interface.

5 Manage from Anywhere

Access your SD-WAN account from anywhere with online management.

6 Built-in Network Security

Security options include VPN & firewall.

7 Instant Visibility

Increase visibility of user activity with centralized administration portal.

8 Best Available Solutions

Our team evaluates your needs & selects the best available solutions.

9 Low Upfront Costs

Lower business expenses with no expensive hardware to install.

10 24/7 RingSquared Support

Expert technical support available when you need it, with offices across the country.

Who Is SD-WAN For?

- ✓ Businesses with multiple locations
- ✓ Organizations moving to a reliable network
- ✓ IT looking for better visibility & management
- ✓ Service providers requiring better system redundancy.

Supported by VeloCloud

RingSquared SD-WAN solutions are built on industry-leading VeloCloud connections to deliver high-performance, reliable service.

SD-WAN Models & Options

- ✓ Edge 610: 100/200/350Mbps
- ✓ Edge 620: 100 - 750 Mbps/1Gbps
- ✓ Edge 640: 100 - 750 Mbps / 1/2 Gbps
- ✓ Upgraded SD-WAN devices to support LTE
- ✓ Edge 3400 for data centers & service providers

Custom-Built Solutions

Every SD-WAN system is custom built to your specific business needs; our team evaluates all available carriers & options to select the best configuration of connections and providers for optimal quality and redundancy.
